

Kaggle #10

Welcome back to Kaggle!

- Kaggle is a large platform for ML and Data Science
 - Datasets, Competitions, Notebooks, Forums, Tutorials etc.
 - Great for CV, Portfolio etc.
 - We will have weekly sessions
-
- Team work
 - Collaboration skills
 - Sharpening coding skills

Last semester...

- 08/10 – Kaggle 01: Welcome to QMML! + EDA w/ Maiesha
- 15/10 – Kaggle 02: Pandas, Matplotlib w/ Maiesha, Monesh & Girish
- 22/10 – Kaggle 03: ML Modelling w/ Stefan
- 29/10 – Kaggle 04: Hyperparameter Tuning w/ Girish
- 05/11 – Kaggle 05: Boosting w/ Monesh & Maiesha
- 12/11 – Kaggle 06: Logistic Regression w/ Monesh & Maiesha
- 19/11 – Kaggle 07: Cross Validation w/ Girish
- 26/11 – Kaggle 08: Random Forest w/ Maiesha
- 03/12 – Kaggle 09: Feature Engineering w/ Monesh

New Kaggle Competition! (February 2026)

The screenshot shows the Kaggle Playground Prediction Competition interface. On the left is a navigation sidebar with options: Create, Home, Competitions (selected), Datasets, Models, Benchmarks, Game Arena, Code, Discussions, Learn, More, Your Work, and a 'VIEWED' section containing 'Predicting Heart Disease...'. The main content area is titled 'Predicting Heart Disease' and 'Playground Series - Season 6 Episode 2'. It includes a 'Submit Prediction' button and a cartoon duck illustration. Below the title are tabs for Overview, Data, Code, Models, Discussion, Leaderboard, Rules, Team, and Submissions. The 'Overview' tab is active, displaying a welcome message, the goal ('Predict the likelihood of heart disease.'), and a progress timeline from 'Start' (12 days ago) to 'Close' (16 days to go). On the right, a sidebar provides details about the competition host (Kaggle), prizes & awards (Kudos, no points or medals), participation (5,852 entrants, 2,473 participants, 2,399 teams, 19,542 submissions), and tags.

Navigation Sidebar:

Overview

Welcome to the 2026 Kaggle Playground Series! We plan to continue in the spirit of previous playgrounds, providing interesting and approachable datasets for our community to practice their machine learning skills, and anticipate a competition each month.

Your Goal: Predict the likelihood of heart disease.

Start
12 days ago

Close
16 days to go

Competition Host
Kaggle

Prizes & Awards
Kudos
Does not award Points or Medals

Participation
5,852 Entrants
2,473 Participants
2,399 Teams
19,542 Submissions

Tags

- Binary Classification task
- Target variable: Heart Disease (0 or 1)
- You must output a probability, not a class label
- Evaluation metric: AUC-ROC
- Measures how well predicted probabilities rank positive vs negative cases

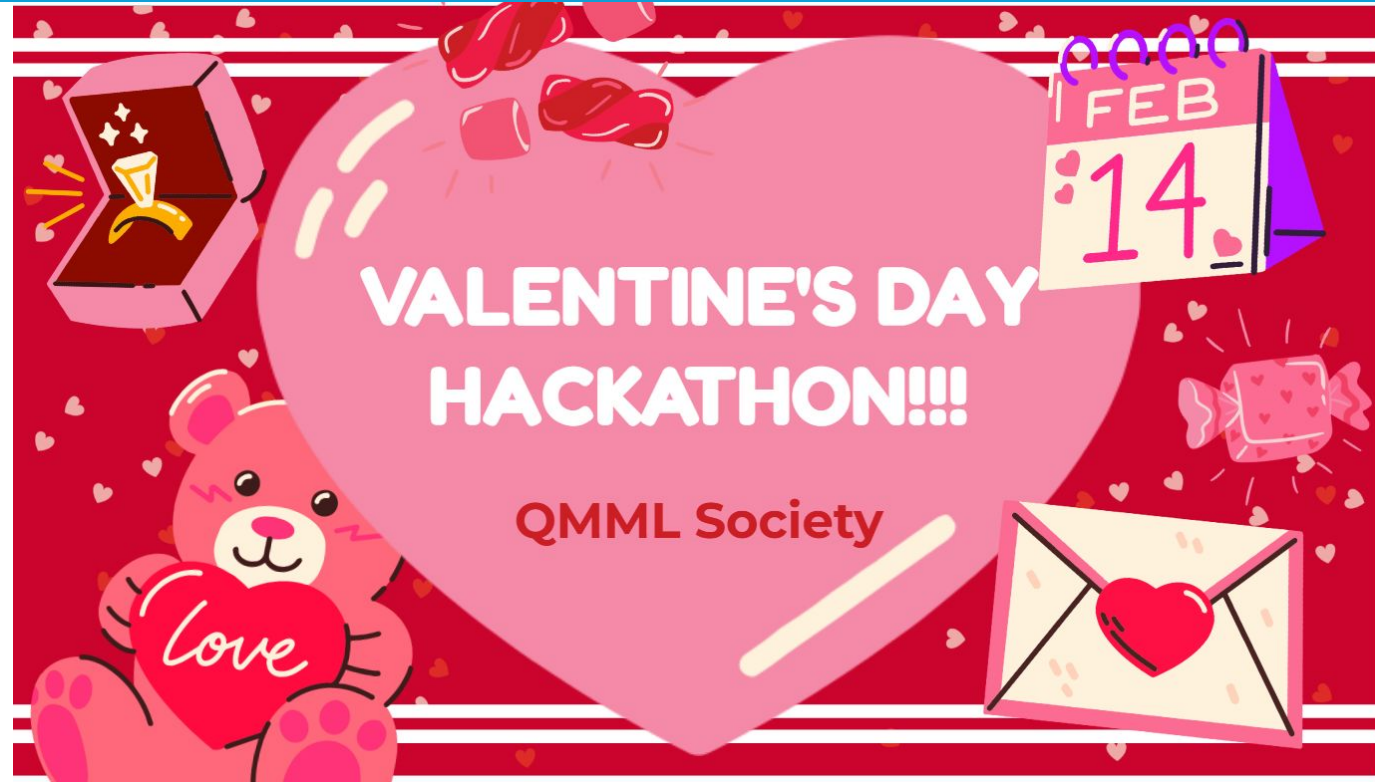

About that Hackathon
