Intro to Kaggle

What is Kaggle?

- World's largest online platform for data science & ML competitions
- Dataset, model, notebook repository
- 15+ mil. Users (2023)
- Top institutions

Massachusetts
Institute of
Technology

Why should you care?

Real data

Real-world data in
many competitions

CV enhancer

Employers care about it
(more than you may think)

Portfolio

Show off your coding
on GitHub

Teamwork

Make friends and
collaborate

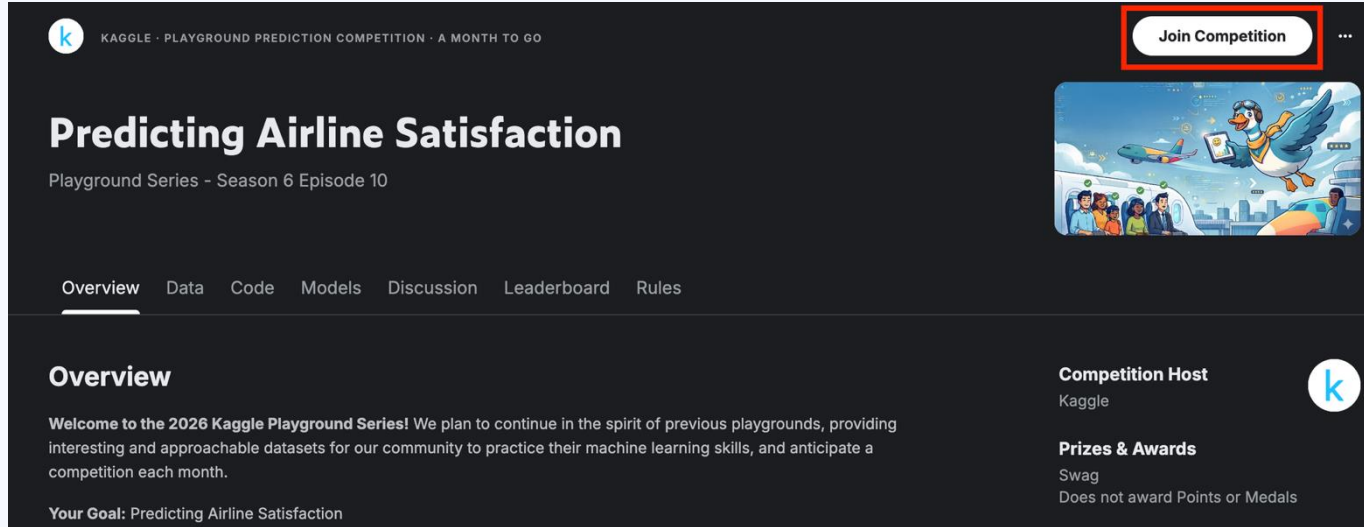

Have you signed up?

You need a Kaggle account to get started. If you haven't already, please sign up.

Our first competition

The image shows the header of a Kaggle competition page. At the top left is the Kaggle logo (a blue circle with a white 'k') followed by the text 'KAGGLE · PLAYGROUND PREDICTION COMPETITION · A MONTH TO GO'. On the top right, there is a red rectangular button with the text 'Join Competition' and a three-dot menu icon to its right. Below this is a large illustration of a penguin wearing a pilot's hat and goggles, flying a small airplane. The penguin is holding a tablet. In the background, there are other airplanes and a city skyline. Below the illustration, there are several small circular icons representing different aspects of the competition.

KAGGLE · PLAYGROUND PREDICTION COMPETITION · A MONTH TO GO

Predicting Airline Satisfaction

Playground Series - Season 6 Episode 10

Overview

Welcome to the 2026 Kaggle Playground Series! We plan to continue in the spirit of previous playgrounds, providing interesting and approachable datasets for our community to practice their machine learning skills, and anticipate a competition each month.

Your Goal: Predicting Airline Satisfaction

DIY

Setting up our project
Walking through material
Making first submission

Clone the QMML repo

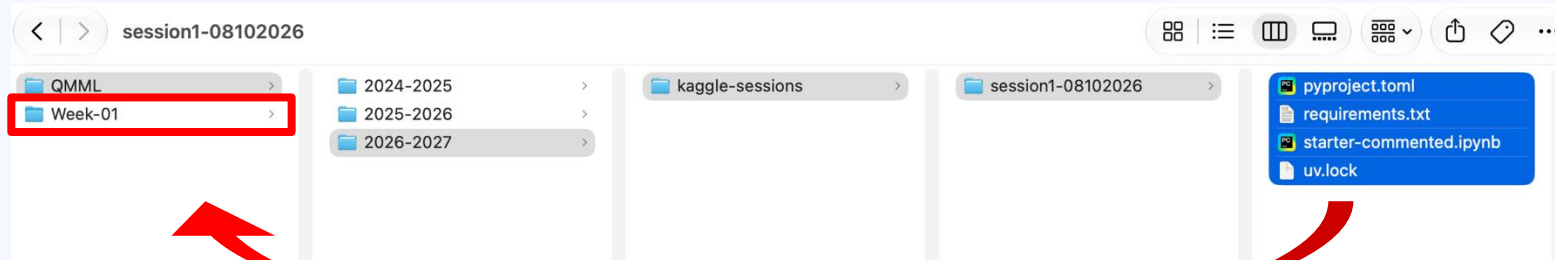

```
user@hostname:~/QMML
```

```
$ git clone https://github.com/Queen-Mary-Machine-Learning-Society/QMML.git
```

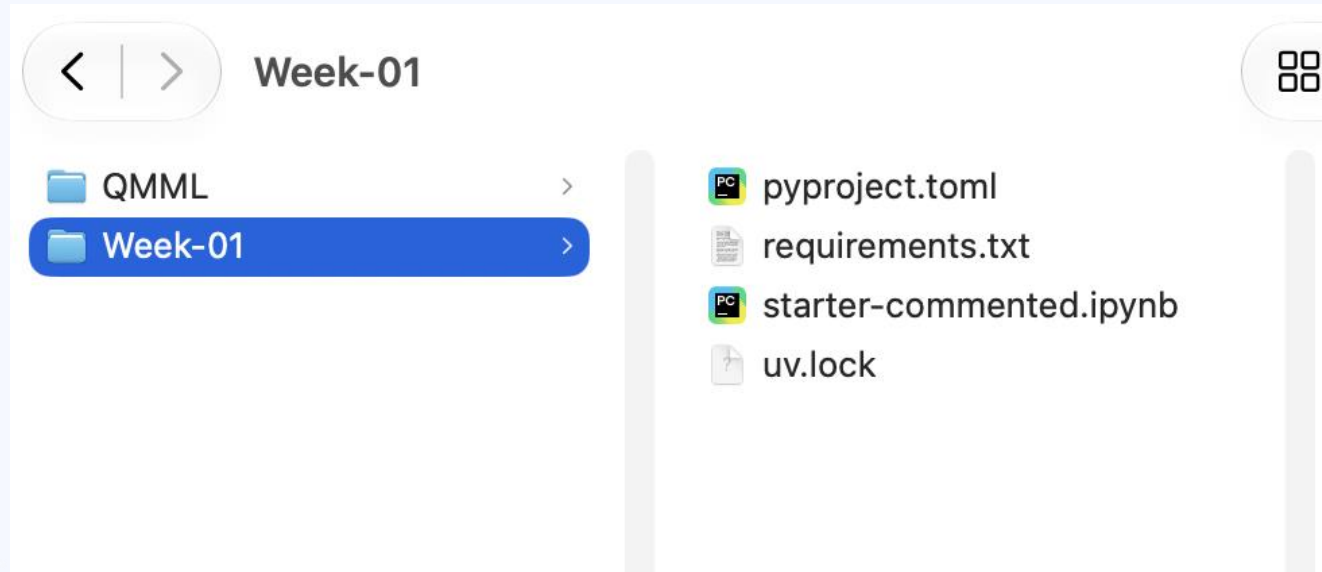

Back into your file explorer

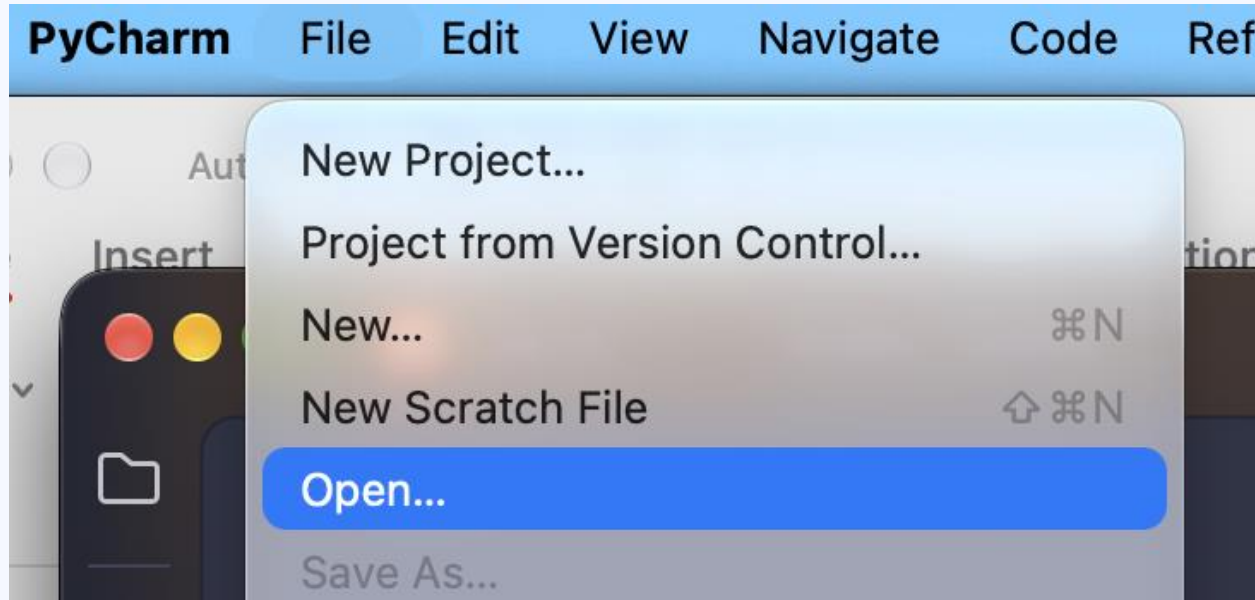

Copy the session 1 files out of the
repo and into your Week-01 folder

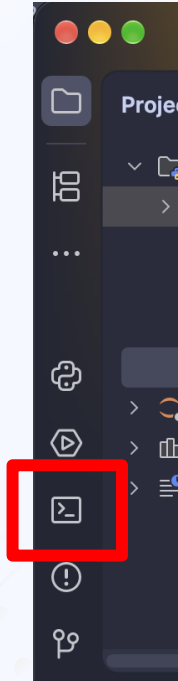

How Week-01 should look like

Open Week-01 in IDE

Installing dependencies

Open a
terminal
window in the
IDE

Install dependencies in terminal

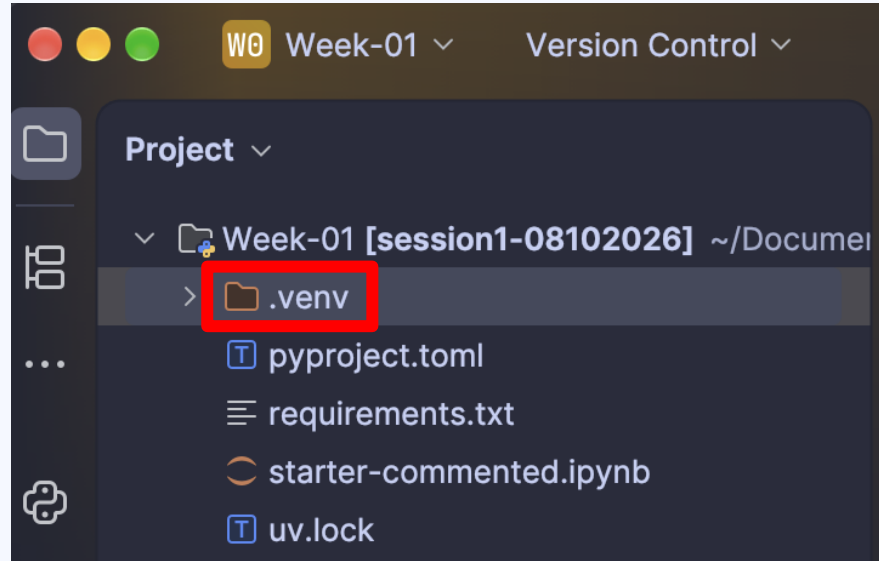

uv

```
user@hostname:~/Week-01
$ uv sync
```

pip

```
user@hostname:~/Week-01
$ python3 -m venv .venv
$ source .venv/bin/activate      # macOS/Linux
# .venv\Scripts\activate        # Windows
$ pip install -r requirements.txt
```
